

# WHERE DO YOU FEEL AT HOME?

Currently 1.8 million inhabitants of non-Dutch origin live in the Netherlands. Together they represent two hundred nationalities, of which 139 nationalities live in Amstelveen alone. **'HOME Art Project'** is an art project in which visual artist Stephanie Rhode *connects different inhabitants, nationalities and backgrounds through a universal theme such as HOME*. The current developments put an extra emphasis on the importance of being and feeling at home.

For this art project, Rhode photographs people holding a white house of wool and asks participants where they feel at home and why. This results in the so-called 'soul photos', in which the participant is depicted from the back, aiding in the visualisation of participants thoughts and feelings on the subject of home.

In addition to a (digital) catalogue in which all photos and anonymous statements of participants are bundled, the art project will be concluded with an overview exhibition (autumn 2023) in the open air in Amstelveen. The plan is that exhibition will travel further afterwards, maybe even to all 139 countries, to show the connection between Amstelveen and the Netherlands and the rest of the world.

A pre-exhibition will take place in the **COBRA Museum of Modern Art** in Amstelveen from March 10 to May 7, 2023.

A follow-up exhibition will then take place in the **Schouburg Amstelveen** from May 9th to July 2023
